INSTRUCTIONS TO PAPER SETTERS FOR THE PREPARATION OF SCHEMES AND SOLUTIONS

The objective of preparation of scheme and solution is to ensure an uniform valuation among valuers / examinations across different valuation centers.

The scheme and solutions should be legibly hand written in black ink, so that it could be xeroxed and distributed.

The scheme & solution does not mean the splitting of final marks into its component parts (example 2+2+4+2). It has to clearly show the expected answers / response for each component. **(In case the questions are of descriptive nature, the solutions should contain salient / important points of answer)**

The scheme and solution which merely shows the component marks are liable to be rejected.

The extent of solutions should not exceed the enclosed four pages / sheets and should only indicate the expected important points / steps / graphs / drawings / circuits / figures / calculations / tables and final numerical answers, along with the marks allocation for each of these.

Please bear in mind that the students have to complete the answers within 3 hrs / 4 hrs and answer five full questions.

The allocation of marks shall be an indicator, for the students, for the extent of answers expected.

Marks could be allocated for step-wise development of concepts / answers / figures / circuits / graph / flow diagrams / block diagrams, giving due importance or weightage for factors like neatness / exactness / accuracy in numerical values / units / calculations.

The figures / drawings and views / circuit diagrams that are part of answers shall also be given in the solution to ensure that the same is being uniformly evaluated by all the examiners.

Answers shall not be in the form of references / citations where author's name / title of the book / chapter numbers / page numbers / paragraphs / figures etc. are indicated. You cannot expect the examiners to carry the books to the valuation centre.
